Problem Statement:

The current IT procurement process lacks efficiency and automation, resulting in delays and manual overhead, particularly in handling standard laptop orders. Requests for standard laptops often require configuration, but this step is prone to oversight or delay, leading to frustration among users and inefficient resource allocation within the IT department.

User Story:

As a member of the IT procurement team, I want a streamlined process for ordering standard laptops so that tasks are automatically generated and assigned to the hardware team for configuration. This will ensure that laptops are promptly configured upon arrival, reducing user wait times and minimising manual intervention.

Project Objective:

The objective of this project is to implement an automated workflow using Flow Designer to facilitate the procurement and configuration of standard laptops. By integrating automation into the process, the project aims to:

1. Create a seamless experience for users requesting standard laptops by ensuring timely configuration.
2. Reduce manual intervention and potential errors in the procurement process.
3. Improve resource utilisation within the IT department by optimising task allocation.
4. Enhance overall efficiency and productivity in IT procurement operations.

TASK INITIATION

Milestone 1 : Flow

Activity 1: Create a Flow to Create Catalog task to update the short description after Approval the service Request and it will be Assignment group to Hardware.

1. Open service now.
2. Click on All >> search for Flow Designer
3. Click on Flow Designer under Process Automation.
4. After opening Flow Designer Click on new and select Flow.
5. Under Flow properties Give Flow Name as “ Standard laptop task”.
6. Application should be Global.
7. Select Run user as “ System user ” from that choice.
8. Click on Submit.

The screenshot displays the ServiceNow Flow Designer interface. At the top, the 'servicenow' logo is visible, followed by a search bar containing the text 'Flow'. Below the search bar, the 'FAVORITES' section shows 'No Results'. The 'ALL RESULTS' section lists several items, including 'Dockers Webhook Answer Subf...', 'Process Automation Flow & Action Designer', 'Flow Designer', and 'Flow Administration'. The 'Flow Designer' item is highlighted with a star icon.

The bottom part of the screenshot shows the 'servicenow Flow Designer' header with a home icon and a navigation menu. The 'Flows' tab is selected, and a 'New' button is visible. Below the navigation menu, there is a search bar and a table of flows.

Milestone 2 : Flow assignment

Activity 1 : Flow Assignment to Standard laptop service Catalog.

1. Open ServiceNow.
2. Click on all search for Maintain Items.
3. Select Maintain Items.
4. Under the name field search for Standard Laptop Select that record.
5. Under that record select Process engine
6. Remove the remaining automations and add Flow.
7. Add the flow that was created with the name “ Standard Laptop Task”.
8. Click on the menu to save the record.

The screenshot shows the ServiceNow Catalog Items list view. The left sidebar contains navigation links for 'mainta', 'Service Catalog', 'Catalog Definitions', 'Maintain Catalogs', 'Maintain Categories', 'Maintain Dynamic Categories', 'Maintain Items', 'Maintain Cart Layouts', 'Service Catalog Wizards', and 'Maintain Wizards'. The main table lists catalog items with columns: Name, Short description, Active, Roles, Catalogs, Category, Price, Type, and Updated. The table contains four rows of data.

Name	Short description	Active	Roles	Catalogs	Category	Price	Type	Updated
Standard Laptop	Lenovo - Carbonx1	true		Service Catalog	Hardware	\$1,100.00	Item	2024-04-16 04:14:53
Standard 27" Monitor	Size - 27", Resolution - 1920x1080, ...	true		Service Catalog	Peripherals	\$0.00	Item	2022-11-20 20:46:33
Standard 22" Monitor	Full HD, IPS Panel with VGA, HDMI, DVI, ...	true		Service Catalog	Peripherals	\$200.00	Item	2016-03-08 16:49:50
Standard 24" Monitor	TUV-certified Monitor Has Flicker-free S...	true		Service Catalog	Peripherals	\$292.28	Item	2022-11-20 20:46:33

The screenshot shows the 'Standard Laptop' catalog item detail view. The top bar includes navigation links and buttons: 'Update', 'Copy', 'Try It', 'Edit in Catalog Builder', and 'Delete'. The form fields are organized into sections: 'Name' (Standard Laptop), 'Application' (Global), 'Catalogs' (Service Catalog), 'Category' (Hardware), 'Active' (checked), 'Fulfillment automation level' (Unspecified), 'State' (-- None --), 'Checked out' (-- None --), and 'Owner'. Below these fields are tabs for 'Item Details', 'Process Engine', 'Picture', 'Pricing', and 'Portal Settings'. The 'Process Engine' tab is selected, showing a message: 'Select the appropriate process engine for the catalog item. Only one engine can be selected.' Below this message are three input fields: 'Flow' (Standard Laptop task), 'Workflow', and 'Execution Plan'. At the bottom are buttons: 'Update', 'Copy', 'Try It', 'Edit in Catalog Builder', and 'Delete'.

Milestone 3 : Service Catalog

Activity 1: Service Catalog for placing order and get Approval

1. Click on All >> Search for “ Service Catalog ”.
2. Click on Service Catalog >> click on Hardware.
3. Scroll a bit to find the “ Standard Laptop ” click on that.
4. After that click on “ Order Now ” to place the request.

Conclusion :

By automating the standard laptop procurement process with ServiceNow's Flow Designer, the project effectively addresses inefficiencies and reduces

manual overhead. This streamlined workflow ensures timely configuration of laptops, minimizes user wait times, and enhances overall productivity within the IT department. The implementation of this automated solution not only optimizes resource allocation but also significantly improves the user experience by providing a seamless and efficient procurement process.
